# Portable HV test sets for DC voltage testing of cables and cable installations

- Available in three versions: 50/80/110 kV
- Monitoring functions maximise safety and ease of operation
- Quick and easy to set up
- Meets individual needs through a modular design

### DESCRIPTION

The HV Test Set is a cable tester for the DC voltage testing of cables and cable installations in accordance with international standards.

The set consists of a control unit and an HV Unit and is available in three versions (50/80/110 kV). Because it is compact and light, it is easy to transport and use on-site.

#### The HV Test Set series is used for:

- Testing newly installed cables and splices before commissioning
- Periodic cable testing
- Testing electrical installations
- After-repair testing on cable systems or HV-plants

#### Technical features

- Easy operation
- Light and compact design
- Integrated discharge device
- Earthing safety circuit
- Overcurrent tripping
- Guaranteed quality in accordance with DIN EN ISO 9001
- Ecologically safe insulating oil

#### Environmental protection

To protect the environment we use a new type of biodegradable, non-toxic insulating oil.
